

## NOTICE

**Date:** June 22, 2010

**To:** Waukesha County Communities affected by last nights storm

**From:** Dale Shaver, Director,  
Department of Parks and Land Use

A handwritten signature in black ink that reads "Dale R. Shaver".

**RE:** Processing Storm Damaged Trees

The county yard waste processing site is available to any community that needs assistance with disposing of trees damaged during last nights storm. S&R Compost, the operator of the county yard waste site, has agreed to process trees up to 32 inches in diameter for \$13.50 per ton, which is 50% of normal processing costs for "wood wastes" (defined as 6 inch diameter or greater). Any yard waste (less than 6 inch diameter) will continue to be processed at no cost to the community.

Delivery of wood and yard waste can be done between 11:30 am -3:30 pm. Extended hours can be arranged by calling Dave Rublis, S&R Compost at 262-617-5823. Trees should be cut to 6 foot lengths, following the standard protocol, which is attached. The county processing site is located on CTH C, about 1 mile south of STH 18 in the Town of Genesee.

Further details, such as site address, can be found in the attached protocol. Other program related questions should be directed to Jim Rose, Land Resources Division at 262-896-8308 or [jrose@waukeshacounty.gov](mailto:jrose@waukeshacounty.gov).
